PROFILE

Proficient iOS developer with expertise in Swift, SwiftUI, and React Native, dedicated to crafting clean, elegant, and maintainable code that adheres to SOLID principles. Creator of the App Store-listed project AWSupportLogger, showcasing a commitment to innovative and impactful solutions. Skilled in UI development, unit testing, and debugging, with a proven ability to manage projects independently and thrive in collaborative team environments within the software development lifecycle.

WORK EXPERIENCE

iOS & React Native Developer

2023 - PRESENT

Wingmate: Lead Capture App - Toronto

- Led the end-to-end development of the Wingmate React Native application, from concept to launch, applying modern design principles that optimized layout, improved user engagement, and earned positive reviews.
- Served as Scrum Master, facilitating daily stand-ups, sprint planning, and retrospectives, fostering a collaborative and iterative development environment.
- Maintained and enhanced legacy iOS and Android codebases, integrating updates and new features to ensure seamless functionality and improved performance.

iOS Developer

2018 - 2022

EatSleepRIDE Motorcycle GPS - Toronto

- Developed a data-sharing feature that enabled users to save up to 30% on motorcycle insurance by integrating the app with insurance brokers.
- Increased unit test coverage from 30% to 45%, improving code quality, reducing bugs, and enhancing reliability.
- Implemented SOLID principles to develop modular, maintainable code, enabling seamless feature integration and improving app stability.

PASSION PROJECTS

AWSupportLogger

SwiftUI, Firebase API

An app that allows business clients to submit IT support tickets, track their progress, and communicate directly with IT Support Specialists through a live chat feature.

RetroTrader

Cloud Firestore Database, Swift Database, CocoaPods

An app that allows users to log workouts, customize workout names, muscle groups, and exercises, all within a clean and simple interface.

Effortflex

UICollectionView, Core Data Database, MapKit

An app that enables retro gamers to buy, sell, and trade rare vintage video games within a community-driven platform.
